

OPTIMAL ROUTEING (LOCAL ROAMING NUMBER)

Favor the inbound visitors of selected roaming partners.

- ◆ Suppress the "tromboning" when one of your subscribers calls selected inbound visitors. (A foreign visitor from one of your group of mobile company).
- ◆ Lower the charge (local rate) when one of your subscribers calls this visitor.
- ◆ Keep, lower or suppress the charges to the visitor.

- ◆ No need of the Optimal Routeing feature in the GMSC, which would not work (SEND ROUTING INFO to foreign networks not opened generally).
- ◆ Simple standard configuration in the GMSC for the ranges of your favored partners.
- ◆ No international call performed, the favored visitor is called internally by the local roaming number.

Billing:

- ◆ Mobile Terminating Call tickets are generated for each call received by the favored visitors: you can decide to charge or not the reception of this call, based on your group policy. Adapt your tariff strategy on the reception.
- ◆ Your subscribers Mobile Originated calls ticket is for a local call, not a long distance call.
